

ACCA'S APPROVED LEARNING PARTNER – STUDENT TUITION GOLD LOGO

This logo has been specially designed so that it can be reproduced onto any background without compromising the elements contained within it.

Where possible, the logo should be printed in black only. Where black is not an available colour, any other single colour (as shown in the yellow example on the right) may be used. The ACCA and all other lettering must always be white. The logo also contains an integral white border outline. This will only reproduce if the logo is placed onto a coloured background as shown on the right.

IMPORTANT: For printing purposes ACCA will supply you with EPS files which you should pass on to your print provider. EPS files can be 'placed' or 'inserted' into most software applications. It is only possible to 'open' EPS files with specialised software and this operation is not necessary or required before using them. To view the logo, open the PDF version which should also have been supplied to you.

GIF files for on-screen use are created at 100 by 100 pixels. **THE GIF FILE MUST NOT BE USED FOR PRINT PURPOSES.**

USAGE NOTE

Where possible, the logo should be placed towards the outer edges of a page or screen layout and preferably towards the bottom right. However, this is a recommendation only and should not restrict or compromise a layout. An area no less than 4mm must be allowed between the entire outer perimeter of the logo and any other text, graphical element or page edge etc. Only officially supplied digital artwork should be used and under no circumstances should the logo be recreated or altered i.e. by cropping or stretching. No other text or graphical elements may be added to the logo and none of the elements contained within the logo may be removed or rearranged.

The logo on a coloured background

Recommended minimum size

Leave a 4mm space around the entire perimeter of the logo
